BUILT FOR CONSTRUCTION

Certified Partnership

STACK's integration with Acumatica allows you to easily estimate and bid projects without needing to re-enter Sales Quotes, Estimates or Project Budgets in Acumatica. This means less time and less manual work to get your job done.

What STACK partners are saying:

“STACK understands the lifecycle of a project, and how the estimate is the financial foundation. Their team is dedicated to bringing a state-of-the-art, modern platform to an industry that still estimates projects on legacy systems or spreadsheets.”
