

Smarter Bids. Stronger Financials.

Streamline your precon process with cloud-based takeoffs, detailed estimates, and seamless data integration.

Integrating STACK with Sage streamlines the ability for customers to be able to import projects from Sage, and for STACK customers to be able to export estimates into Sage Intacct as project estimates.

Reduce Risk. Drive Results.

Reduced Manual Entry

Automated data transfers save time and reduce risk of human error, like double entry or inconsistent data.

Accurate Reporting

Directly sync estimates in real-time, improving visibility and accuracy between project data and financials.

Operational Efficiency

Seamless data flow between systems enables better collaboration and smoother transitions.
