

STACK for Excel

Seamlessly connect all of your STACK data directly into Excel.

Eliminate the hassle of manual exports and transform how your team estimates, analyzes, and reports on construction projects.

STACK for Excel — powered by **Velixo**, the leading provider of Excel integration tools — allows estimators the flexibility to deliver custom reporting with the accuracy of STACK data, giving contractors the insights they need without disrupting existing workflows.

Automatically Build Reports

Build custom reports, proposals, and more driven by seamless, real-time STACK data directly within Excel.

Unify Estimating & ERP Data

Combine STACK data with your financial details – unlocking end-to-end project visibility and accelerating insights.

Save Time & Boost Efficiency

Access data without disrupting your existing workflow. Keep critical item and quantity info in sync without any manual steps needed.
