

Preconstruction in the Cloud

We're going all-in for lightning-fast takeoffs, accurate estimates & bid-ready proposals.

STACK's preconstruction tools allow us to more quickly measure digital plans, collaborate with our team and you, and finalize project estimates—all from one streamlined cloud-based platform.

Plan, Spec & Document Management

Keeping project details & supporting documents organized means better processes & more informed teams.

Cloud-based Quantity & Material Takeoffs

Faster project takeoffs empower our team to work anytime, anywhere, and allow us to better serve you.

Detailed Cost Estimating

The ability to adjust material costs, tax, and non-measured costs supports extremely detailed, accurate estimates.

Real-time Collaboration & Connectivity

Robust markup, callout, sharing & invitation features keeps our team – and yours – aligned from start to finish.
